

SBL Orionis Cetus Seafood ERP Solutions

SBL Orionis Cetus is a comprehensive seafood ERP solution aimed at optimizing the routine processes in a seafood business and improving the grade and quality of the final products while also improving the efficiency of labor and financial resources invested for the business.

Designed with the latest technologies, our seafood ERP solutions promises businesses to realize cost control initiatives by identifying and fixing those areas causing a drainage of their finances while also boosting productivity in each of their departments. Managers can now take better informed decisions and plans after analyzing the activities and cost data for each department in the seafood company both in terms of work allocation and sales targeting.

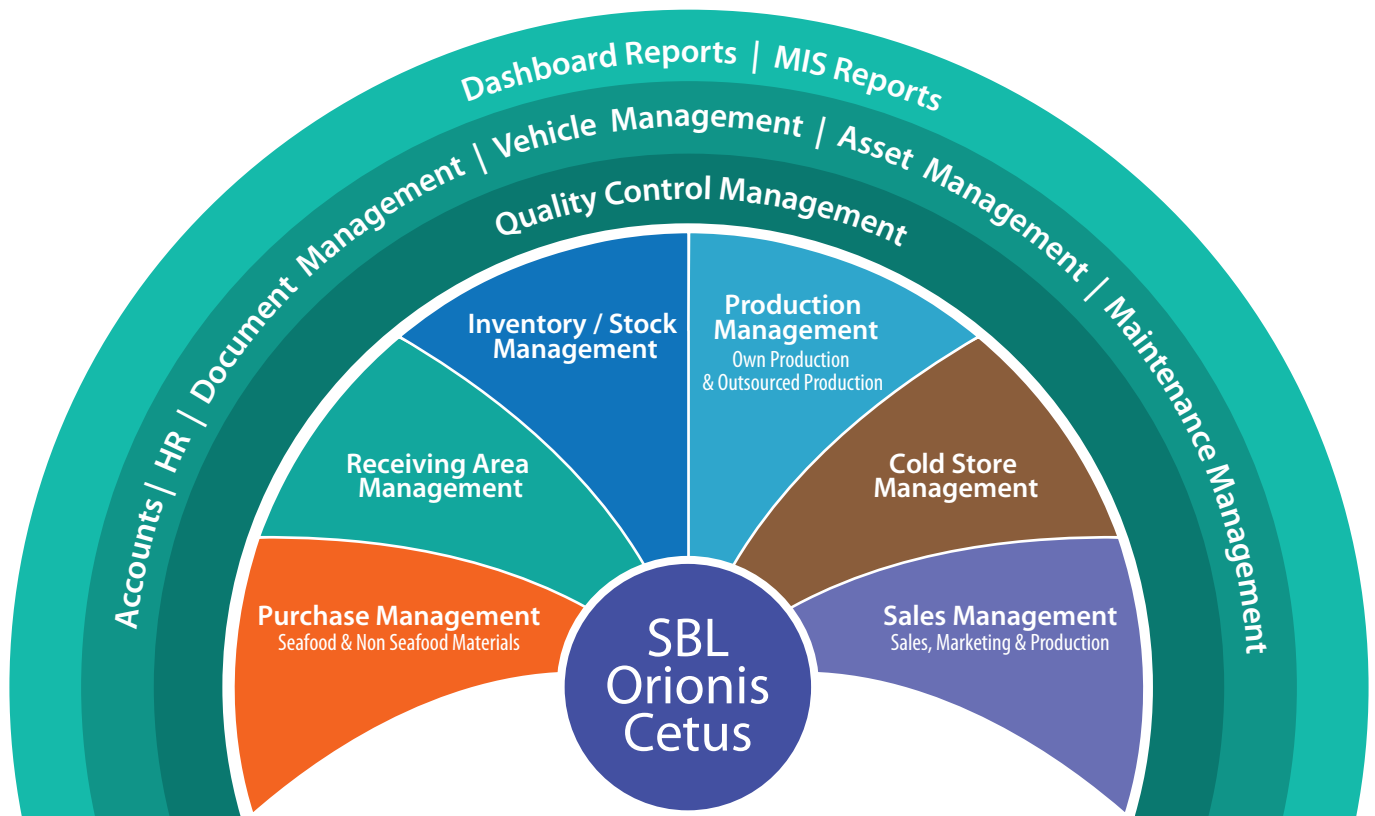

■ Salient Features

- ▶ Integration of all the routine processes and systems in every departments of the organization - purchase, inventory, production, selling & distribution, accounts & human resources, hence eliminates communication gaps between them.
- ▶ It helps to prevent material shortages, cash mishandling and inventory problems as data can be accessed real-time and measures can be taken before such occurrences.
- ▶ Inbuilt business intelligence systems like DSS (Decision Support Systems), EIS (Executive Information System), Reporting, Data Mining and Early Warning Systems (Robots) that facilitate better managerial decision making and annual forecasts.
- ▶ Enhanced Social Audit and Security features
- ▶ Easy-to-trace supply-demand linkage with branches and remote locations in different countries
- ▶ Advanced information access and monitoring of enterprise operations
- ▶ Labor-saving and efficient use of resources
- ▶ Sales and Profit Analysis Dashboard
- ▶ Cost-wise records for each department and stage of processing
- ▶ Easily scalable software that can be adjusted according to the growth in size of the organization

■ Modules

SBL Orionis Cetus harmonizes inventory control, purchases, fish processing, rejected items, quality control and sales and export activities and lets you know the detailed figures or the monetary value right from the point of catch, unpacking, washing and grading, skinning, evisceration and fileting, processing and packing to the point of sales. Every activity of the seafood company operations including rejection of fish, packing and so can be tracked via our ERP software.

The transparency that SBL Orionis Cetus provides through detailed cost records which can be generated at each and every stage enables optimal consumption of materials, fewer waste quantities, better client servicing and lesser miscalculations.

■ Benefits

- ▶ The ERP solution consolidates multiple applications and department activities into one and provides a real-time view of what's going on inside your organization that accounts for faster business decision taking, speedy production as well as time and labor savings.
- ▶ It avoids risk of losing expensive and sensitive information as the ERP software encompasses multiple layers of security and permissions.
- ▶ Well-informed production planning and decrease in lead time and delivery period of components from one department to another.
- ▶ Improved sales-targeting
- ▶ Customizable software
- ▶ 360 degree costing and seamless end-to-end traceability
- ▶ Real-time fishing data
- ▶ Environmental tracking and eco-harvesting
- ▶ Vessel and vendor management
- ▶ Quota management
- ▶ Recording of the catch for the day and sales
- ▶ Details of settlement made for the crew
- ▶ Broker management and details of commission payable
- ▶ Integrated production and payment tools
- ▶ E-commerce solutions
- ▶ Lab, hatchery or farm level
